Houghton Library is the principal book and manuscript library of Harvard College. The library’s holdings are particularly strong in the following areas: European, English, American, and South American literature, including the country’s pre-eminent collection of American literary manuscripts; philosophy; religion; history of science; music; printing and graphic arts; dance; and theatre. Fellows will also have access to collections in Widener Library as well as to other libraries at the University. Applicants need not apply for a specific fellowship. Preference is given to scholars whose research is closely based on materials in Houghton collections (especially when those materials are unique); fellowships are normally granted to scholars who live within commuting distance of the library.

FUNDING: Eight Short-Term Fellowships are available to assist scholars who must travel to work with library collections. Each fellow is expected to be in residence at Houghton for at least one month during the period from July 2010 through June 2011. The stipend for each fellowship is $3,000. Long-Term Fellowships are available to assist scholars in preparing a proposal. Fellowship Selection Committee, Houghton Library; duhaime@fas.harvard.edu;

CISAC offers pre and postdoctoral and professional fellowships for concentrated study in a multidisciplinary environment. Fellows spend the academic year at Stanford University, where they participate in seminars, and interact with each other as well as faculty and researchers. They are expected to produce a research product (e.g., dissertation chapters, draft articles, a book manuscript). The Center considers applicants working within a broad range of topics related to peace and international security. Suitable topics may include, but are not limited to: transnational processes affecting conflict and human security; the United Nations and global governance; causes and prevention of conflict; determinants of post-war settlements; the interaction of science, politics and policy; nuclear energy and nuclear nonproliferation; proliferation and nonproliferation of nuclear, chemical and biological weapons; terrorism and counter-terrorism; the politics of homeland security; the determinants of foreign and military policy within and across states and regions. Fellowships are available to Ph.D. candidates who have made substantial progress toward the completion of their dissertation and to scholars with Ph.D. or equivalent degrees from the United States and abroad. The Center invites applications from a variety of areas of expertise, including anthropology, economics, history, law, political science, sociology, medicine, and the natural and physical sciences. The Center also seeks applications from professionals, such as military officers or civilian members of the U.S. government, members of military or diplomatic services from other countries, and journalists interested in institutional security issues. Predoctoral fellows receive stipends comparable to those awarded by the Stanford Graduate Fellowships program and postdoctoral fellows receive stipends determined on a case-by-case basis. Professional stipends are commensurate with experience. Health care and other benefits are also provided for both pre and postdoctoral fellows.
OFFICE OF THE PROVOST

SAUL FISHER Philosophy of Architecture: Analytic Approach Graham Foundation for Advanced Studies in the Fine Arts N/A

DEBORAH GARDNER CUNY Teacher Academy and CUNY Hunter Ellen Knowles Harcourt Fellows Arthur Harcourt Foundation $150,000
