

RESPONSIBLE CONDUCT OF RESEARCH TRAINING

Required for those Conducting Research

- Faculty
- Graduate and Undergraduate Students
- Doctoral Candidates
- Post-Doctoral Researchers
- Staff

How does cuny define research?

Research means a systematic experiment, study, evaluation, demonstration or survey, in any academic field, designed to develop or contribute to general knowledge (basic research) or specific knowledge (applied research) by establishing, discovering, developing, elucidating or confirming information about, or the underlying mechanism relating to, causes, functions or effects. (Source: <https://www.cuny.edu/research/research-compliance/>)

Where to get training?

www.citiprogram.org

- Register if you are a first-time user
- Select Responsible Conduct of Research Training
- It is 'good' for 4 year

Collaborative Institutional Training Initiative

This is a separate module from your training for Human Subjects, Animal Research and Conflict of Interest (COI) training.
